TISSUE ADHESIVES

Histoacryl®

Histoacryl® Flexible

Histoacryl® Octyl

DESCRIPTION

In addition to traditional skin suturing, surgeons can use a tissue adhesive.

The tissue adhesive Histoacryl® consists of monomeric n-butyl-2-cyanoacrylate, which polymerises quickly in connection with tissue fluid. Histoacryl® is available in two colors: translucent, special for facial application, and blue, which enables an easy control over the quantity applied.

The formation of esophageal and fundal varices is a common and dangerous consequence of portal hypertension. Effective sclerosation of these varices is possible with Histoacryl®. It can be employed for non-bleeding and for bleeding varices. Combined therapy with Histoacryl® and conventional sclerosation therapy is possible.

Histoacryl® Octyl

HIGH VISCOSITY TOPICAL SKIN ADHESIVE

DESCRIPTION

Histoacryl® Octyl is a sterile, high viscosity liquid topical skin adhesive containing a monomeric (2-octyl cyanoacrylate) formulation. It is provided in a single use aluminium collapsible tube applicator packaged in a rigid PETG blister with Tyvek lid. The applicator is comprised of a self-puncturing cap and a soft elastomeric tip, which allows the adhesive to spread uniformly. As applied to skin, the liquid is syrup-like in viscosity and polymerises within minutes. The increased viscosity in Histoacryl® Octyl is intended to reduce the risk of unintended placement of the adhesive during the application due to migration of the liquid adhesive from the wound site.

Sangustop®

Lyostypt®

Cellistypt®

Bone Wax

DESCRIPTION

Sangustop® is a felt-like hemostatic. It is composed of native absorbable collagen fibrils of bovine origin; in addition, Sangustop® contains riboflavin. The product is wet-stable and, thus, can be completely removed after hemostasis is achieved, if so desired. In addition to its good hemostatic properties Sangustop® is characterized by good shaping properties, softness and absorbency. Sangustop® possesses a high affinity to bloody surfaces. The felt structure being rich in surface offers an ideal framework for the adhesion of blood platelets and, thus, provides an additional impetus to clotting. Sangustop® is available in the form of rectangular pieces of various sizes.

DESCRIPTION

Lyostypt® is a wet-stable, felt-like collagen haemostatic and is composed of native, absorbable collagen fibrils of bovine origin. The product keeps its shape, even when it is soaked with blood, and, thus, can be completely removed after bleeding has stopped, if so desired. The felt structure being rich in surface offers an ideal framework for the adhesion of platelets and, thus, provides an additional impetus to clotting.
